

# Welcome to your Motion Sensor

## Setup

1. Make sure the Motion Sensor is within 15 feet (4.5 meters) of your SmartThings Hub (or compatible device with SmartThings Hub functionality) during setup.
2. Use the SmartThings app on your smartphone to select the “My Home” tab and then select “Add a Thing”.
3. Remove the tab on the Motion Sensor marked “Remove When Connecting” and follow the on-screen instructions in the SmartThings app to complete setup.

## Troubleshooting

1. Remove the cover of the Motion Sensor, hold the “Connect” button for 5 seconds, and release it when the LED starts blinking red.
2. Use the SmartThings app on your smartphone to select “Add a Thing” and then follow the on-screen instructions to complete setup.

If you’re still having trouble connecting the Motion Sensor, please visit [Support.SmartThings.com](https://support.smartthings.com) for assistance.

## Using your Motion Sensor

### Placement

The Motion Sensor can detect motion up to 15 feet (4.5 meters) away with a 120 degree field of view.

Simply place the Motion Sensor facing the area that you'd like to monitor and make sure there are no objects blocking its view.

The Motion Sensor can also monitor temperature.

### Suggestions

There are many ways that you can use a Motion Sensor to add smartness to your home:

- Use one in your basement and set it to send you a message if unexpected activity is detected.
- Use one on your stairs and set it to turn on connected lights when motion is detected.
- Use one in your living room and set it to turn off connected lights when everyone's gone.
- Use one in your hallway and set it to turn on a connected thermostat when someone's in the house.
- Use one in your garage and set a connected camera to send you a video alert when unexpected activity is detected.
